

HEYER ENGINEERING, INC. FARGO, ND

Heyer Engineering, Inc., founded in 1983, is a full-service structural consulting engineering firm that provides structural services for public and private sector projects. Due to their continued growth, a new structure was needed to serve their current and future staffing needs.

One of the most experienced firms in the region, Heyer Engineering, with more than 350 plus years of combined engineering experience, supported by 16 technicians and designers, provides its vast knowledge and experience to any client, any project, any time.

Building is steel frame featuring a glulam and steel truss roof structure supporting a wood deck. The structure has a clerestory spine allowing natural light into the open work space. Large windows line the offices allowing additional light to stream in as well as providing external views.

Project Size: 11,600 SF

Completion Date: 2020

Project Cost: \$2.5 Million
