

# ESSENTIA HOSPITAL & ADDITION

FARGO, ND

This six-story 133-bed hospital, which includes a mechanical penthouse on the seventh level and a full basement offers a birthing center, and 24-hour emergency room with a Level II Trauma Center and Comprehensive Stroke Center plus more.

Unique to this structure are floor to ceiling windows offering warm natural light.

The structure consists of a structural steel frame with a composite slab floor system. The building has a steel bar joist and metal deck roof system. Shear walls and braced frames provide that lateral bracing system. On the exterior are architectural precast panels.

## Project Size:

Hospital: 200,000 SF  
Addition: 115,000 SF

## Completion Date:

Hospital: 2000  
Addition: 2015

## Project Cost:

Hospital: \$75 Million  
Addition: \$50 Million
