

# MEDICAL CENTER - UNIVERSITY OF NORTH DAKOTA

GRAND FORKS, ND

The five-level Medical Center allows the School of Medicine & Health Sciences to completely implement its Healthcare Workforce Initiative.

The project includes a main building with two wings. The center building holds a lobby surrounded by various classrooms, small-group rooms, an auditorium, simulation center, anatomy labs, and learning communities. The east wing is for faculty, staff and administrative offices, and the west wing for research. The fifth floor supports a mechanical penthouse.

Unique to the project are the two cantilever stairways in the atriums.

The entire structure is cast in place post tensioned concrete. A deep foundation system consisting of 350 driven steel pipe pile was used to support the building.

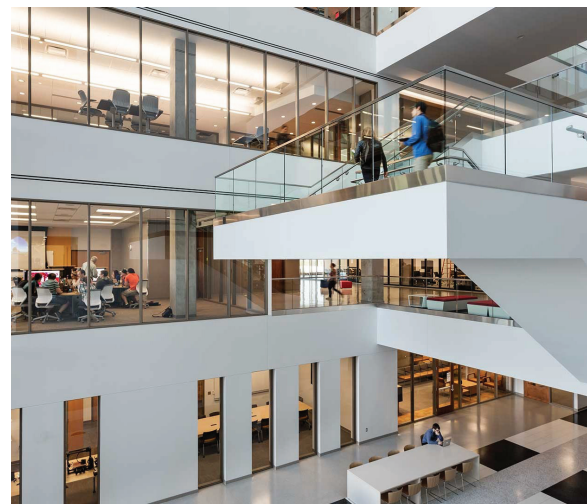

**Project Size:** 375,000 SF

**Completion Date:** 2016

**Project Cost:** \$129 Million
